

CONDOR GOLD

Presentation

January 2018

Disclaimer

- Certain statements contained in this presentation constitute forward-looking information under applicable Canadian securities laws. These statements relate to future events or future performance. All statements other than statements of historical fact may be forward-looking statements. Forward-looking statements are often, but not always, identified by the use of words such as “seek”, “anticipate”, “plan”, “continue”, “objectives”, “strategies”, “estimate”, “expect”, “may”, “will”, “project”, “predict”, “potential”, “targeting”, “intend”, “could”, “might”, “should”, “believe” and similar expressions. These statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. Condor Gold plc (“The Company”) believes the expectations reflected in those forward-looking statements are reasonable but no assurance can be given that these expectations will prove to be correct and such forward-looking statements included in its presentation should not be unduly relied upon.
- In particular, this presentation contains forward-looking statements pertaining to the following: mineral resource estimates; targeting additional mineral resources and expansion of deposits; the Company’s expectations, strategies and plans for its Nicaraguan projects, including the Company’s planned exploration and development activities; the results of future exploration and drilling and estimated completion dates for certain milestones; successfully adding or upgrading mineral resources and successfully developing new deposits; the timing, receipt and maintenance of approvals, licences and permits from the Nicaraguan government and from any other applicable government, regulator or administrative body; production and processing estimates; future financial or operating performance and condition of the Company and its business, operations and properties; benefits of the La India Project to Nicaragua and the local community; and any other statement that may predict, forecast, indicate or imply future plans, intentions, levels of activity, results, performance or achievements.
- This forward-looking information is not based on historical facts, but rather on current expectations and projections about future events and is subject to risks and uncertainties. These risks and uncertainties could cause actual results to differ materially from the future results expressed or implied in this presentation. Such risks may include, without limitation: mineral exploration, development and operating risks; estimation of mineralisation, resources and reserves; environmental, health and safety regulations of the resource industry; competitive conditions; permitting and licencing risks; operational risks; negative cash flow; liquidity and financing risks; funding risk; risks related to the Company’s amended and restated net smelter return royalty agreement with International Royalty Corporation; exploration costs; uninsurable risks; conflicts of interest; exercise of statutory rights and remedies; risks of operating in Nicaragua; government policy changes; ownership risks; artisanal miners and community relations; difficulty in enforcement of judgments; the Company’s staggered board of directors; market conditions; stress in the global economy; current global financial condition; exchange rate and currency risks; commodity prices; reliance on key personnel; dilution risk; and risks related to the payment of dividends. For more information about the risks and challenges of the Company’s business, investors should review those factors discussed in the section entitled “Risk Factors” in the long-form non-offering prospectus of the Company dated December 21, 2017, available on the Company’s profile at www.sedar.com

Disclaimer

- Statements relating to “mineral reserves” or “mineral resources” are deemed to be forward-looking statements or information, as they involve the implied assessment, based on certain estimates and assumptions, that the reserves and resources described can be profitably produced in the future. Readers are cautioned that the foregoing lists of factors are not exhaustive. The forward-looking statements contained in this presentation are expressly qualified by this cautionary statement.
- Although the forward-looking statements contained in this presentation are based upon assumptions which the Company believes to be reasonable, the Company cannot assure holders of its ordinary shares that actual results will be consistent with these forward-looking statements. With respect to forward-looking statements contained in this presentation, the Company has made assumptions regarding: future commodity prices and royalty regimes; availability of skilled labour; timing and amount of capital expenditures; future currency exchange and interest rates; the impact of increasing competition; general conditions in economic and financial markets; availability of drilling and related equipment; effects of regulation by governmental agencies; the receipt of required permits; royalty rates; future tax rates; future operating costs; availability of future sources of funding; ability to obtain financing and assumptions underlying estimates related to adjusted funds from operations. These forward-looking statements are made as of the date of this presentation and the Company disclaims any intent or obligation to update publicly any forward-looking statements, whether as a result of new information, future events or results or otherwise, other than as required by applicable securities laws.
- The disclosure contained in this presentation of a scientific or technical nature relating to the Company's La India Project has been summarized or extracted from the technical report entitled “*Technical Report on the La India Gold Project, Nicaragua, December 2014*”, dated November 13, 2017 with an effective date of December 21, 2014 (the “**Technical Report**”), prepared in accordance with National Instrument 43-101 – *Standards of Disclosure for Mineral Projects* (“**NI 43-101**”). The Technical Report was prepared by or under the supervision of Tim Lucks, Principal Consultant (Geology & Project Management), Gabor Bacsfalusi, Principal Consultant (Mining), Benjamin Parsons, Principal Consultant (Resource Geology), each of SRK Consulting (UK) Limited, and Neil Lincoln of Lycopodium Minerals Canada Ltd., each of whom is an independent Qualified Person as such term is defined in NI 43-101. The information contained herein is subject to all of the assumptions, qualifications and procedures set out in the Technical Report and reference should be made to the full details of the Technical Report which has been filed with the applicable regulatory authorities and is available on the Company's profile at www.sedar.com.
- The scientific and technical information in this presentation has been read and approved by David Crawford, Chief Technical Officer of the Company, and Peter Flindell, a non-executive director of the Company, each of whom is a Qualified Person as defined by NI 43-101.
- This presentation does not constitute an offer, invitation or recommendation to subscribe for or purchase any securities in the Company. Neither the presentation, nor the fact of its distribution, shall form the basis of, and the presentation should not be relied on in connection with, any contract or future decision to acquire the Company's securities.

Company Overview

- Developing the La India Gold Project, in Nicaragua, into production
- High grade gold resource
 - Indicated resource of 9.6Mt at 3.5 g/t gold for 1.08Moz gold
 - Inferred resource of 8.5Mt at 4.5 g/t gold for 1.23Moz gold
 - Indicated resource contains probable mineral reserves of 6.9Mt at 3.1 g/t for 675,000 oz gold
- Final stages of permitting
 - Direct conversation with local community
- Goal of proving a major Gold District of 4M to 5M oz gold
- Nicaragua is a mining friendly jurisdiction
- Strong Board and Management with extensive experience
- TSX Dual Listing on 15th January 2018

Strategy Statement

Twin strategy

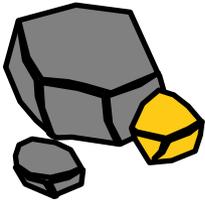

- Permit and construct a base case of 2,800tpd processing plant, producing 100,000 oz gold per annum at Mina La India, Nicaragua.
- Continue successful exploration strategy to expand mineral resources by 1M to 2M oz gold and prove a major Gold District

Investment Case

- Undervalued compared to peer group on TSX (quarter Valuation)
- Serious backing from World Bank, Jim Mellon and Ross Beaty
- 0.20 times price to book ratio
- US\$18 per indicated + inferred resource oz gold in the ground.
- Indicated resource of 9.6Mt at 3.5 g/t gold for 1.08Moz gold
- Inferred resource of 8.5Mt at 4.5 g/t gold for 1.23Moz gold
- Including Probable Mineral reserves of 6.9Mt at 5.3 g/t for 675,000 oz gold.
- US\$700 all-in sustaining cash cost
- PFS base case 80,000 oz gold per annum over 7 years
- Upside scenarios available by adding feeder pits and underground operations
- District scale potential of 5M oz of gold

Nicaragua

- Nicaragua is a good place to be:
 - Mining friendly jurisdiction
 - 6 Toronto listed companies operate successfully in Nicaragua
 - 3 open pit mines recently permitted in country for B2Gold and Golden Reign
 - Gold is the country's third biggest export
 - Nicaragua is rated as the safest country in Central America

- Good Infrastructure in place
 - Pan American highway 15km away
 - Grid powerline following the road through licence area

La India Project

- La India is a historical mining district
- Condor holds a 313km² concession package covering 98% of La India Gold Mining District
- Indicated resource of 9.6Mt at 3.5 g/t gold for 1.08Moz gold (inclusive of probable mineral reserves)
- Inferred resource of 8.5Mt at 4.5 g/t gold for 1.23Moz gold
- Core Area made up of three vein sets
 - La India, America and Mestiza
- Condor has drilled 65,000m of the district

PFS

Probable mineral reserve of 6.9Mt at 3.1g/t gold for 675koz gold producing 80koz p/a gold for seven years

Permitting

- Permit for a base case open pit mine at La India is at an advanced stage
 - Re-permitting the former mine which closed in 1956
 - Construction of a 2,800 tpd processing plant, producing 100koz of gold p/a
 - AISC under \$700/oz
 - Upfront capital cost of \$120M
- Passed all technical reviews of EIA
- Condor has had in constructive talks with national government over past 18 months
 - The government had given its blessing for Condor to now enter into direct dialogue with the local community to form a resettlement agreement
 - Strengthening team on the ground to help with community relations and stakeholder engagement
 - The local community lies in the old mining district and of a mining heritage

Benefits of The Mine

To Nicaragua

- US\$120M foreign direct investment from a British Company
- Show case state of the art mine in Central America with best possible environmental practices
- 3% royalty on sales
- 30% corporation tax

To the Community

- United Nations poverty index at 41% in local community
- Reduces 75% to a poverty index of 11% with a new mine
- 500 jobs during the construction period
- 300 jobs during the operations
- Average salary in mining in Nicaragua is US\$700pm vs US\$200pm nationally
- Training courses to improve skills and salaries
- For every 1 job in a mine 5 jobs supplying the mine
- New healthcare center and school
- Water 24/7 not 1 hour in 48 hours

Exploration Upside: Proving a Major Gold District

Exploration Upside

Core Area

- The core area includes the La India, Mestiza and America veins
- Intention to increase in core area
 - 20,000m drilling required to potentially add 900,000oz gold to the Mineral Resource
- Following the high grade ore shoot discovery Condor is now carrying out trenching and rock chip sampling

Mestiza vein set resource

- 6,000m resource conversion drilling completed since March 2017
- Historical estimate of 2.4 MT at 10.2 g/t for 786,000 oz of Soviet GKZ-style 1991 resource in C1+C2 categories *
- 1.5 Mt @ 7.5 g/t for 333,000 oz gold Inferred to NI 43-101 in Technical Report
- New Discovery
 - High Grade ore shoot / 450m strike x 200m depth x 2.2m average width
- Mestiza Resource excluded from current PFS
 - Strong potential to add to future mine plan

* The above historical estimate was not prepared to the standards of NI 43-101 and should not be relied upon. The historical estimate was considered relevant at the time of acquiring the Project, and the qualified person has completed sufficient technical work along with additional sampling by the Company to convert this estimate to the standards as defined by the CIM. The current Mineral Resource is inclusive of the areas defined in the historical estimate.

Increase contained gold in core project area

20,000 m Drilling required to add potentially 900,000 oz Gold in Resource

6,000 m Drilling Completed on Mestiza in 2017

Vein Set	Current Resoruce	Target	Increase
La India	1300k oz	1600k oz	
America	479k oz	630k oz	
Mestiza	333k oz	780k oz	
TOTAL	2112k oz	3010k oz	43%
Cacao	58k oz		
Central Breccia	56k oz		
San Lucas	59k oz		
Tatascame	34k oz		

Blue sky

Geochemistry Survey & 2,800m Scout Drilling

Andrea-Limonas corridor

- 12km long mineralised corridor discovered on the Andrea-Limonas strike
- Rock chips 142g/t, 52g/t gold
- 2,800m Scout drilling completed on 4 targets

Cacao

- a wide dilutional opening has been discovered, 17m at 2.6g/t gold

What's Next at la India Project?

Once permits granted

- 12 months of additional technical studies to BFS
- 18 - 24 month construction period

Expand Gold Resources

- 8,500m drilling in 2017
- Targeting increase in contained gold in resource by approximately 0.9M ounces

Demonstrate District Play

- 2,800m scout drilling completed in 2017
- Follow up on targets generated by soil survey, structural study
- Rock chip sampling and trenching continuing in District
- Geological mapping continuing in District
